

# Mir Faisal Ahmad

## Front-end web Developer

As a web designer, I bring creativity, technical expertise and a passion for design to every project. I have the skills to turn a client's vision into a visually stunning and user-friendly website that engages and informs visitors. I am a master of design and a problem-solver, who stays up-to-date on the latest design trends and technologies. Let me help you create a website that stands out and showcases your brand in the best light possible. Let's work together and make it happen.

## WORK EXPERIENCE

### Web Design Intern Creative IT Institute

08/2022 - 01/2023

Dhaka, Bangladesh

Creative IT Institute is a trusted organization dedicated to creating breakthroughs in IT. Since its inception, Creative IT has been contributing to building Digital Bangladesh for a long 14 years and achieving multi-faceted success through groundbreaking changes. Since 2008, this IT company, one of the most important in Bangladesh

#### Tasks

- Build a landing page for BrightSkills App.
- Build a responsive website with a bunch of different CSS frameworks.

### Tuition as web design

#### Online - Google Meet | Zoom

01/2019 - Present

Home tuition for me as a web designer is a great way to teach students online, allowing them to learn at their own pace in their own homes. I can provide individualized instruction on various web design topics such as HTML, CSS, JavaScript, and more. I can also allow students to work on real-world projects and help them develop the skills they need to succeed in the web design industry. With online home tuition, students have flexibility in their schedule and can learn at their convenience. Overall, home tuition is a valuable option for anyone looking to improve their web design skills and take their career to the next level.
